MINI BELLOWS PUMPS

Bellows Module Kits

Proper selection of bellows module and poppet valve replacement kits depends on the X-code of the model number and not on the pump type (ie. single, tandem).

	1/2"	3/4"	1"	1 1/2"	2"
EPT/EPDM	02501-315	02501-356	02501-357	02501-358	02501-359

Crank Kits

1. Proper selection of crank replacement kits depends on the position of the module in relation to the motor.
2. Use diagram below the chart to determine the location of the crank being replaced. When proper size and location are decided upon, use crank kits chart to obtain kit number for ordering.

MINI BELLOWS PUMPS - REPLACEMENT KITS

Poppet Valve and O-Ring Kits

The standard elastomers for the poppet valves and O-rings are EPT/EPDM, Hypalon® and Viton®/Fluoroelastomer. These elastomers have historically been able to handle the vast majority of the applications in which we've been involved. However, Butyl, Hydrin, Kel-F®, Silicone and Nitrile can be supplied for chemicals requiring such materials.

Duckbill Valve and O-Ring Kits

Duckbill valves are required in those applications where heavy slurries or fibrous materials are being pumped. Heavy slurries should be flushed from the bellows before the pump is shut down. The standard elastomers are EPT/EPDM, Hypalon, and Viton®/Fluoroelastomer. However, Butyl, Hydrin, Kel-F®, Silicone and Nitrile can be supplied.
